

### **Energy Conservation Campaign**

**Name of the Department :** Physics  
**Name of the event :** Energy Conservation Campaign  
**No. of participants :** 18  
**Date :** 20-06-2022 & 21-06-2022

#### **Introduction:**

Energy conservation has become an important issue in today's world. With the increasing population and demand for energy, it has become essential to conserve energy resources and promote sustainable development. In this context, a group of 18 students from II B.Sc (MPCs) under the guidance of Dr. P. Indira and Sri. B. Srinivasa Rao, faculty of Physics of DS Government Degree College for Women, Ongole, organized an energy conservation campaign on 20-06-22 and 21-06-22.

#### **Objectives:**

The main objective of the campaign was to create awareness among the people about the importance of energy conservation and promote sustainable energy practices. The campaign aimed to educate people about the impact of energy consumption on the environment and the need to adopt energy-efficient practices.

#### **Activities:**

The students organized various activities to promote energy conservation during the two-day campaign. The students organized door to door campaign to educate people about energy-efficient practices. The campaign covered topics such as energy-efficient lighting, air conditioning, and heating, and the use of renewable energy sources such as solar energy. The students also demonstrated the use of energy-efficient appliances and encouraged people to adopt them.

#### **Outcome:**

The energy conservation campaign organized by the students was a great success. It created awareness among the public about the importance of energy conservation and promoted sustainable energy practices. The campaign helped in identifying areas where energy could be conserved and encouraged people to adopt energy-efficient practices.

#### **Conclusion:**

The energy conservation campaign organized by the students of II B.Sc (MPCs) was a great initiative towards promoting sustainable energy practices. The campaign created awareness among the public about the importance of energy conservation and encouraged people to adopt energy-efficient practices. Such initiatives are essential to promote sustainable development and conserve our precious energy resources.
