17. Does the Institution have Management Information System ?	Yes
<p>If yes, give a brief description and a list of modules currently operational (maximum 500 words)</p>	<p>Students' admissions for the last three years have increased gradually due to the collective efforts made by both the teaching and nonteaching staff. The admissions of students through online process are taken up by the institution using the APSAMS website i.e Student Academic Management System software especially designed for the student's admission by CCE, AP. Students will apply online for admission, our admission committee will follow up and confirm with the database collected from students through emails and messages. Attendance: It is very Important thing for higher education institutions to monitor their student's attendance. since olden days it was assumed that regular attendance leads to higher knowledge, best marks, and a more satisfying educational experience, especially if they were academically weaker or if the students have the low potential. It is suggested that a progressive approach to attendance monitoring is the most effective asset of every institution. Our college has introduced the smart biometric attendance system, i.e. hourly attendance through IAMS Mobile approved by Government of Andhra Pradesh, Commissionerate of collegiate education, it is the new adaption of smart system which replaces the traditional approaches. We take count of every period for every class by concerned faculty using IAMS app. The reliability is the main advantage of smart biometric system which clearly shows the presence of a student in a class. In teaching learning process, all required academic documents are going to be uploaded and updated regularly. Mostly in science subjects, the method of teaching is through PPT presentations, video clippings etc., but in arts and commerce curriculum is delivered fore mostly through traditional methods. Our college social media pages i.e. Facebook and Twitter is regular with updating all college activities for awareness on societal issues and health activities. Being a district nodal college, Eoffice is our</p>

administrative weapon to render amenities to district wide higher education administrative services. Our Library is automated with N list, to cater the needs of both faculty and students. ICT infrastructure and system maintenance: We have 4 working LCDs, 3 basic smart boards for digital teaching, 20 working computers and also 30 Laptops given by APSSDC for the digital needs of our students with internet connection of 3 points with speed of 100MBPS. we also have Printers, scanners and Xerox facilities in college. Our computer faculty will maintain the systems regularly for better performance. Regular backup, password protection etc will be maintained periodically with integrity. Each system is adequately provided for appropriate security, antivirus and password management systems. Also, we have 20 KWH solar energy plant system. Student performance evaluation: Our Jawahar Knowledge centre staff are going to facilitate online registration for examinations and share online results to the students. Our examinations committee work under university instruction during examinations and send internal assessment promptly through online submission before final examination. So far, we are taking hard copies of feedback from students on faculty, curriculum, parent feedback and other feedback forms and we are uploading scanned copies. But this year we have taken online feedback

CRITERION I – CURRICULAR ASPECTS

1.1 – Curriculum Planning and Implementation

1.1.1 – Institution has the mechanism for well planned curriculum delivery and documentation. Explain in 500 words

All the programs of the courses taught in the college are affiliated to Acharya Nagarjuna University, Guntur. Hence all the departments of our institution ultimately implement the syllabus introduced by Nagarjuna University. Our institution has a well organised curriculum delivery and documentation. The time table committee constituted by the principal with the senior faculty members designs suitable timetable by giving importance to academic as well as co-curricular purposes like NSS, WEC, JKC, library, sports, MANA TV programs, skill development, literary and cultural activities. All the activities are documented in a proper way by the in-charges of the departments as well as the coordinators of the respective committees. At the beginning of the academic

year, a meeting was organized by the principal to discuss on the preparation of academic calendar which includes academic activities, co-curricular, extra-curricular activities, cultural, patriotic days celebrations, student seminars, group discussions, guest lectures, class tests, internal assessment consisting of the formal evaluation process, and certificate courses. At the beginning of semester each department organizes departmental meetings to discuss and distribute the syllabus among the faculty members and to prepare the departmental timetable with departmental activities and minutes were recorded in the minutes book. Each program of the department is elaborated in terms of program outcomes which are aligned with graduate attribution. . During the course of semester academic diary is maintained by every faculty. Daily classes and practical sessions are observed by HODs. For the welfare of the students Ward counseling system is adopted by the institution periodically to give personal, academic and career counseling by the faculty. As per the UGC guidelines, the faculty members are deputed for Orientation and Refresher courses conducted at UGC academic staff colleges of various universities to develop their skills of teaching and to learn new methodologies. University examinations are conducted as per the schedule. On declaration of university results, compilation of result analysis is done by all the departments. The college has conducted workshops, training programs and faculty development programs for improving the quality of education in enhancing the effective transmission of curriculum. The faculty has participated in national and international faculty development programs and Quiz competitions of various topics during the lockdown period of COVID-19 Pandemic, Computer laboratory and digital classrooms are of great use in making teaching more effective. Virtual classes are of its best in sharing the content . Library is rich in reference books and INFLIBNET is great support for students and faculty. Feedback system is followed by the institution by collecting feedbacks from students on faculty, infrastructure and curriculum. Parent feedback is collected on curriculum through discussions by arranging parents meeting. Faculty maintains a good rapport with parents as well. The discussions with students on the curriculum and teaching learning process are of great use in understanding the proper implementation of the curriculum. Use of JKC, language labs, science labs, career counselling programs and job mela are introduced by the college proved to be very supportive for the students are also helped in achieving objectives.

1.4.2 – How the feedback obtained is being analyzed and utilized for overall development of the institution?
(maximum 500 words)

Feedback Obtained
<p>In higher education there is a great importance for feedback system to enhance the teaching and learning skills of the teacher. Every Academic year feedback has been taken from students on faculty and infrastructure facilities of the college. Also Parents, Alumni and employers feedback on curricular aspects and teachers feedback on curriculum. Syllabus related feedback from the students gauged around employability, current contents etc., Feedback on infrastructure and facilities also measured around admission process, library facilities etc., Teachers' Feedback on usefulness of the syllabus in terms of employability, scope for research, establishment of community linkages, reasonable coverage of contents. Employers' Feedback was evaluated around students' employability skills, infrastructural availability in college for conducting campus placement/training programmes, University Syllabus and Company Expectation and so on. Opinions so collected were reviewed and averaging was done to arrive at conclusions and implementations. Feedback tools are studied and revised, if necessary after discussion in IQAC with students, teachers, alumni and employers. They are the stake holders involved in taking feedback on courses, programmes, teachers and infrastructure of the institution, support facilities and so on. As most of our students are from Rural back ground, traditional way of feedback tools are still continuing. The impact of feedback on future preparation in teaching techniques, monitoring, evaluation will be improved and in turn effects the success. The feedback tools are prepared according to the formats provided by NAAC. The questionnaire is sometimes modified according to the institutional needs and context. The importance given to the students in contributing for assurance and enrichment will be resulted through various mechanisms such as student satisfaction report which effects future planning. The student feedback on faculty contains 21 questions and feedback will be collected on each faculty member by random selection of the students. The outcomes of the questionnaires will be discussed as per programme level in their respective departments by evaluation. The suggestions are implemented by the faculty for better performance. Feedback on faculty includes- effective teaching, sincerity , punctuality in attending the classes, accessibility of the teacher outside the classroom for academic interaction , evaluation methods and discussion methods after evaluation. Academic, personal, career counseling and guidance given to the students ,encouragement and transparency. The feedback is analyzed by Internal Quality Assurance Cell with incharges of the departments and vice principal . Feedback on infrastructure contains the questionnaire regarding -Library with reading room, Digital facilities,</p>

availability of the internet ,cycle stand, classroom facilities with LCD/ computers, cafeteria etc. After the feedback is analyzed, the needs of the students will be improved as far as possible. Alumni meeting is organized in every academic year and feedback is collected from alumni on physical facilities, Library ,curriculum etc .This year alumni has newly registered and their association to involve more in academic related activities, useful both for the students and the community. Periodic parents meets are arranged to attain feedback from them on curriculum enrichment. Parents are very much satisfied by the co curricular activities along with academic activities initiated by the institution for the all round development of the students for their near future. The institution maintains a good rapo with the parents.

2.3.2 – Students mentoring system available in the institution? Give details. (maximum 500 words)

D.S.Government Degree College(w),Ongole has a strong students mentoring system that provides a many opportunities to the students through valuable advises from the faculty regarding academic, social performances

and maintenance of hygienic conditions. For the sake of elevating girls involvement in higher education, student mentoring system must play an imperative roll at every institution of Higher Education. Many girl students from rural backgrounds need support and encouragement in great amount from faculty and peers, in order to sustain their studies in a gentle way. So, our college principal has allotted mentorship to the full-time faculty according to the roll and needs of the students. Mentors have not only made discussions with the students in detecting issues, they also participated in the meetings conducted by Parent-Teacher Association as well as conducted enquiries for preparing action plan for the experience of the best mentoring provision. In addition, conducting mentoring surveys would be more helpful to identify the issue rather than conducting oral sessions. After diagnosing a problem, faculty-mentors have come forward to resolve the problem, being faced by mentee by conducting regular counselling sessions as per the time slot seriousness of the issue. And mentees always expects their issues to be confidential. Now a days, many students become addicted to social media usage when they are studying higher education as they are supposed to maintain groups on different purposes. In our college, we conduct a role-play on ill-effects of excessive use of social media platforms and a Debate competition has been organized on pros and cons of social media. This kind of cultural and literal events would lead to bring awareness amongst the students on following social etiquette and netiquette as well. Students must be given mentoring on maintenance of hygiene in order to use common toilets in the college. For this reason, guest lectures, being delivered by persona of Health Department have been arranged by college medical inspection committee. Our college Red Ribbon Club has initiated a many awareness programmes. Among those, the genuine addressing of AIDS positive speakers is remarkable initiative which made students aware of diseases infected due to their personal hygiene and social attitude. Besides, ahead of semester examinations students had categorized into three groups as excellent, moderate and slow learners for providing sufficient material for different subjects. Grouping the students can be viewed in negative perspective by some educationalists however, at the higher education level, students must be catered with required resources according to their needs and interests amid the competitive world. Study hours have also been taken by faculty beyond the working hours. At the age of adolescence, students are much affected by peer groups. Sometimes, students can't reveal their personal issues at the presence of faculty-mentors. They may be reluctant to disclose the issues when an elderly person enquires. So, we have arranged peer mentoring not only for sharing personal struggles, but also for improving mentees performance in the all areas .We mentor our students for their over all development and to enhance confidence in them.

Student council of students is a Student organization body present in many colleges and universities in higher education. It is dedicated to social organizational activities and gives academic support to college administration. We are very proud to say that our institution has a vigorous student Council which always comes forward to organise the crucial occasions which are meant for students involvement and participation. We believe that the main motto of the student union is to represent fellow students with some passion that can be well-fulfilled in our college. It will help to increase the students social responsibilities and build the leadership qualities. Student union should be a place that brings students together to connect, collaborate and learn. Getting involved in activities outside of the curriculum can help students to develop a wide perspective and improve social skills. As a result students expand their networks, which is beneficial for finding career opportunities after graduation. The student Council of our institution is a unique elected body which will be directed by the student union committee that consists of three faculty members form Student union council in the college and it is headed by College principal and the senior faculty member acts as a convener to motivate the students for conducting the programs on their own knowledge.The elected

body of the students of each class elected a representative and the total representatives of the class elected President and vice President from final year students secretary from second year students and the general secretary from first years. the total body that is all flash representatives president vice president secretary and joint secretary. The Student who has been elected as a president of student union should be always agile and active to represent the voice of the student community. The student union plays a pivotal role in addressing student issues to the principal through the committee. Student union is also responsible for providing a variety of services to the students.

Students get involved in the union by becoming active in a committee by attending general meetings organised by the committee. The Student union in our institution helped to create a more vibrant campus life for students. The student union mainly organises the occasion of inaugural day and farewell day during every academic year. In addition to that, the student union takes part in celebrating Teachers Day, Independence Day and Republic Day. On taking the advice from the faculty members involved in the Student Union committee, the students are supposed to prepare the program sheet duly signed by the principal and has to organise it smoothly and effectively. In our college, the student union encourages all students to utilise the resources of library and ICT tools accommodated by the institution. We can say this is a unique committee which has the sole responsible of every activity conducted at the institutional level. It usually focuses on providing students with facilities support and services. Student council of the college organised the college inaugural day on 22nd 8 2019. 7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

1. Title of the practice: Solid Waste Management for Sustainable Development
Objectives: • To make the campus as a living laboratory for building culture of sustainability. • To take advantage of the academic community potential to engage themselves and improve the scenario through teaching, research and outreach in several fields of study . • To form linkages between knowledge and dissemination in the Community. • To elevate the critical role of the lecturer in sustainable development by educating professionals not only to get a good job but also for the better society. • To teach the students the suitable way to manage waste by giving example. • To make campaigns aimed at meeting the 3R's (reduce, reuse and recycle) in waste management initiatives on campus. • To promote 3R's practices to have a positive effect on a students attitudes about resources, it means that simple initiative can bring positive impact on student's behavior. The Context: Society has been increasingly concerned about waste production and consumption growth. Currently, the consumption model adopts a liner process - extraction, production, consumption, and disposal - that there is an increase in resource usage rate and raw material depletion. The more technological development and social progress happen, the higher demand for resources, and consequently, the damage is going to be greater to the environment and society. Waste management in Higher Education Institutions (HEI) there is an incipient study on the context of environmental sustainability. HEIs have an essential role in innovation and knowledge diffusion they are agents of improvement in society. They have a critical role in sustainable development because they have to prepare professionals not only for the market but also for society. Thus, it is important that teach by giving example and awareness of a suitable way to manage waste. There is a wide diversity of waste produced by HEIs, including construction and demolition waste, electronic waste, office waste, lamp, furniture, metal, hostel waste. It is considered as sustainability is the balance between environmental, economic and social factors, a term known as Triple Bottom Line. Equally important is the definition of sustainable development as "...development that meets the needs of the present without compromising the ability of future generations to meet their own needs". Sustainable waste management is a central subject for circular economy, which has received global attention due to dealing with the transition from the linear consumption model to a circular economy model by increasing resource efficiency and harmonizing the relationship between society, environment, and economy. When the student community awareness about waste management, conscious consuming, correct disposal of garbage, etc., it disseminates knowledge everywhere, including acting as a good influencer in where it lives. Solid waste management is a healthy and clean way to eliminate

wastes going into our landfills, which improves the environment. It is the Eco-friendly method of converting organic waste into nutrient rich fertilizer. Vermicompost is the product of the composting process by various species of Earthworms. The beneficiaries can understand the recycling process.

Vermicomposting is a method of using worms to produce organic waste into a nutrient-rich chemical free fertilizer. The main objective of Vermicomposting is to produce organic manure of good quality. Vermicomposting is a method of using earth worms to transform organic waste into a nutrient-rich fertilizer.

The main objective of Vermicomposting is to produce organic manure of exceptional quality for the organically starved soil by using house hold wastes, garden wastes and hostel kitchen waste are usually dumped into at places resulting in a foul mess. PRACTICE AND INFRASTRUCTURE: College has established solid management vermicomposting units in college campus with 4 vermicompost beds having size 2m X 1m X 0.75m which is constructed by bricks and cement. The solid waste beds and vermicompost beds were maintained properly with perfect management. Title of the practice: Digital Empowerment Programme

Objectives: • To make the teachers and students digitally empowered. • To support the continuation of teaching learning practices during COVID - 19 pandemic. • To equip the teachers and students with the required knowledge about virtual classes and other pivotal online tools to transform formal education into online education amid the COVID-19 pandemic.. • To increase the self -efficacy in teachers and student. • To train the teachers in creating digital content. • To help the teachers and students to embrace the technological revolution which will in turn help them become better at what they do. • To address the challenges faced by the teachers and students in adapting to the online teaching-learning process during COVID-19 pandemic. •

For successful implementation of educational change i.e., the shift from traditional teaching-learning methods to online teaching-learning methods. Context: The whole educational system from elementary to tertiary level has been collapsed during the lockdown period of the novel corona virus disease 2019 (COVID-19) not only in India but across the globe. Lockdown is a state of the emergency protocol implemented by the competent authorities (in this case it is central and state governments) to restrict people from leaving their place of living resulting in mass quarantines and stay-at-home across the world since March 2020. As the COVID-19 pandemic spreads, there has been an increasing move towards teaching online because of shutting down of schools, colleges and universities for an indefinite time as the only option left. It looks forward to an intellectually enriched opportunity for further future academic decision-making during any adversity. However, it is a well-established assumption that no pedagogical approach can replace the peak position of formal education due to having teacher-taught direct interaction. But, the aftermath of COVID-19 crisis, online education became a pedagogical shift from traditional method to the modern approach of teaching-learning from classroom to G-Meet, from personal to virtual and from seminars to webinars. Previously, e-learning, distance education and correspondence courses were popularly considered as the part of non-formal education, but as of now, it seems that it would gradually replace the formal education system if the circumstances enduringly persist over the time. Furthermore Educational institutions have a great responsibility in enabling individuals to acquire digital empowerment, i.e., acquisition of information literacy and life-long learning skills. One of the purposes of an education is to train individuals in accordance with the needs of the society. For that reason, nowadays, educational systems are responsible for turning out individuals who have the attributes appropriate for the information age and who can meet the expectations of the information society. For digital empowerment to take place, each individual must be allowed to participate in the changes influencing their life, through using digital technologies, and they must be encouraged in this direction. Digital empowerment, for instance, can be realized when students

increase their skills and knowledge, they learn how to share information, they form new information flows and they increase their interactions and participation in information channels. Earlier to this pandemic, online education is considered as the education provided by the open universities in India. But in COVID-19 induced time, online teaching-learning became a massive challenge to deal with, and stakeholders are not potentially fit to adjust with the sudden educational change as they are not technologically competent to embrace the current situation. PRACTICE: Therefore, for successful implementations of educational change i.e., shift from traditional teaching-learning methods to online teaching-learning methods the college has undertaken various activities during this period. The college has conducted District level 2 day work shop on MOOCS and other digital initiative on the platform of District Resource Centre On 24/01/2020 where in lecturers from all over the district from 13 colleges have attended the programme and gained knowledge. All the teachers and students were trained multiple times to acquire knowledge about virtual classes and other pivotal online tools. The college has introduced G-Suite for conducting online classes. Online class time table was prepared and attendance of the students was monitored through. All the online classes were recorded and made available for the students for the reference. The college has established 3x100 MBPS line connectivity with WIFI and LAN (AP Fiber Connectivity under RUSA - 01 Private Connections - 02) and One 10 MBPS Leased Line under RUSA for Virtual Class. The students who couldn't afford the data recharges, were given access to the college WIFI for attending online classes within the college premises by strictly following social distancing. As part of digital empowerment the students were encouraged to do certificate courses such as Introduction to Computers, Career Edge, Learn programming with JavaScript and Microsoft 365 degrees under MOOCS, TCS iON and IBM Mind MAP P-Tech, irrespective of their academic background. The faculty members also have acquired certificates in Introduction to computer from SPOKEN TUTORIALS, IIT Bombay

7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

As its name suggests, only Government Degree college, meant for women at district headquarters of Prakasam district, D.S Government Degree College(w), Ongole keeps showing its distinctiveness in elevating higher education of the women population of the district and plays quite imperative role in promoting women empowerment activities as well. Under the supervision of women empowerment cell, we have been conducting so many training courses for the past few years. Of these, training for candle preparation is genuinely remarkable by using very low cost material. An exceptional thing can be discovered that no experts made this project possible. The facilitation provided by women empowerment Cell and students' engrossing led to make it successful. After preparation of candles, they have conducted an exhibition sale within the college premises. The multi colored in different moulds, grab the attention of the visitors. The day has been identified with striking evidence of students' creativity and passion towards empowering themselves. The significant outcome of this activity can be cherished for ever as the students utilized money gathered from sales of candles for the sake of charity. It not only provides enriching employability skills of the students It encourages students to support the poor and needy who've been struggling with vulnerable conditions. It's an activity which defines a pure dedication of college where

women empowerment has been determined as primary pursuit and pledge of the principal and the staff. On the occasion of International women's day, all the teaching staff and students along with the principal visited ' Mathrusree old-age home and conducted felicitation for old-age women with flower bouquets. Subsequently we distributed sarees amid emotional moment of elderly people who were missing their young ones from whom they expect this kind of affection and support at the final stage of their life. Our college N.S.S unit and Red Ribbon Club came forward to donate a rice bag to feed the old for few days. In addition, our N.S.S volunteers distributed fruits to the and took the blessing of the old. They also made conversations with the old and enquired the conditions which forced them to leave their family members. Every student cannot forget this precious moment of their life since they might not have experienced the joy of giving for during their lifetime. They felt indebted and grateful to the college in order to let them be aware of social discrimination in the world of nuclear families.

8.Future Plans of Actions for Next Academic Year

Our college future Plan for the next academic year mainly is to start google sites for all the departments. Google sites is a free and great tool for creating websites, which brings together all of the other great Google services embedded in it. It can improve student's digital literacy skills in a collaborative learning environment. As it offers us control over access to the pages it is easy to use with student friendly interface. A site can be created for a class within a couple of minutes using templates for different pages and without the need for advanced technological knowledge. We can include course materials and rich content including videos, audio recordings, images, assignments, study materials and class events also. To make it more specific the institutional goals are divided criteria wise and framed as simple objectives to be fetched. In Criteria I Curricular Aspects: Skill based and Value-added Courses shall be introduced to develop competencies among students. To fill the educational gaps in the brains of students, subject knowledge Bridge Courses shall be given more importance. Online Feedback from all stake holders is planning to take online and will be analysed to achieve constant excellence in the system. In order to facilitate Online learning and rigor E content development, workshop to be organized for teachers, Projects in the subject of Foundation Course for awareness and sensitization of students towards clean environment and ecology. Planning to conduct a greater number of certificate courses that enhances knowledge of students in a specific domain, online quizzes which are automatically graded assignments used to test the understanding level of students in course. Planning to Organize regular Parent Teacher meeting Alumni meeting for improving stakeholder involvement in different aspects of college academic and administrative fields. In research, innovations and extension criteria, we planned to Organize National webinars and workshops, for inculcating research culture among students and enhance research motivation in teachers. Criteria IV Infrastructure and Learning Resources planning to ensure Wi Fi connectivity in all Class Rooms to facilitate best learning experience. Subject wise Compilation of Question Banks as per new CBCS Syllabus, which are used by students that makes them easy and quick to access subject. Student Support and Progression Criteria plans to strengthen skill development and placement cell through entry point enrolment in view of new courses that are going to be introduced in next academic year. Strengthening Remedial classes for disadvantaged group. It improves academic skills and proficiency of students in various subjects. Remedial coaching programme is highly useful to restrict failures of slow learners. Also planning to improve Competitive exams training programme. In Governance, Leadership and Management we are Seeking MoUs to be attained for enabling skill

development and employability of students. Conducting workshop for enhancing efficiency of administration through e-office. Through Institutional Values and Best Practices, we are Planning for more campus initiatives for eco-friendly environment. Replacement of Black boards with White boards were going to be installed for dust free teaching and learning process during the summer vacation.
