AZOLLA POND

Azolla is an aquatic fern that forms symbiotic association with blue green algae like Anabaena to fix atmospheric nitrogen. It has all the qualities of a green manure crop like quick growth, high amount of nitrogen and faster decomposition. Using Azolla as a biofertilizer and as a fertilizer is an eco-friendly approach of plant growth.

An Azolla pond (20 X 12 feet) is being constructed in our college with an aim of using Azolla as a green manure in our college garden. Further, it is planned to gain some income by selling Azolla to the staff members and also to other parties like neighbours and farmers etc. The amount thus obtained will be used for the maintenance of college garden and also in social cause.

Azolla pond is under construction in our college with the contribution of smt. K. Usha Rani, a member of alumni.

SPIRULINA POND

Arthrospira platensis (Spirulina) is a cyanobacteria which is used as a biofertilizer and also as a fertilizer through foliar application. It can provide a number of micro and macronutrients, phyto hormones to the plant.

A pond for growing spirulina is under construction in our college with the contributions of Sri M.V. Vijayakumar Garu, Philanthropist and Sri Ch. Venkateswarlu, lecturer in political science of our college. Spirulina grown in that pond will be used as a fertilizer in our college garden and also it will be used as a source of income.

AQUATIC POND

A pond to represent aquatic ecosystem is being constructed in our college with the contribution of D.Anantha Lakshmi Garu, lecturer in botany, Dr.M. Srinivas Reddy Garu, lecturer in chemistry, Dr.G.Dhanunjaya rao garu, physical director and K. Aruna garu, lecturer in botany.

The college staff particularly the department of Botany sincerely thank our College principal Dr.D.Kalyani garu and all the donators for this wonderful initiation.
