## PROGRAMME OUTCOMES

(Common to all UG Programmes)

| PO |  |  |  |
| :--- | :--- | :---: | :---: |
| no. | On the completion of a Programme, <br> The students will be able to | Benchmar <br> ks | Remarks |
| PO1 | Acquire a comprehensive understanding of domain- <br> specific knowledge and demonstrate their acquired skills <br> effectively during practical transactions within the <br> specific domain. | $70 \%$ |  |
| PO2 | Demonstrate proficient analytical and problem-solving <br> skills through the application of critical thinking <br> strategies to addressreal-world situations effectively. | $60 \%$ |  |
| PO3 | Master effective communication, collaborate skilfully <br> with diverse stakeholders, nurture meaningful dialogues, <br> build strong professional bonds in and beyond college | $60 \%$ |  |
| PO4 | Exhibit proficiency in ethically using information <br> from diverse sources, analysing and synthesizing data <br> effectively forreal-world research. | $50 \%$ |  |
| PO5 | Exemplify ethical standards in personal and professional <br> contexts, appreciate diverse cultures, evaluate social <br> responsibility's impact on well-being, and advocate for <br> women students' betterment. | $70 \%$ |  |
| PO6 | Actively promote social awareness through community <br> service, contributing to a more inclusive and <br> compassionateglobal community. | $80 \%$ | Design <br> edfor <br> CSP |
| PO7 | Embrace continuous learning, create professional growth <br> chances, and prioritize personality development and <br> physicalwell-being for a holistic approach. | $60 \%$ |  |
| PO8 | Foster self-confidence, advocate women empowerment, <br> demonstrate expertise for growth in studies, employment, <br> and entrepreneurship, creating a brighter and equitable <br> future. | $80 \%$ | Designe <br> d for <br> Internshi <br> ps |

## Programme Specific Outcomes (PSO)

## MATHEMATICS PHYSICS COMPUTER SCIENCE

| PSO-No | Upon the successful completion of B.Sc., degree with <br> Mathematics as one of the subject, the students will be able <br> to: | Mapping <br> with POs |
| :--- | :--- | :--- |
| PSO-1 | Understand the concepts of vector spaces, group theory, <br> quantum mechanics, optical, thermal, electrical, mechanical <br> properties of a materials, probability, algorithm design, data <br> base | PO1 |
| PSO-2 | Analyse the concepts of mathematics, physics and computers <br> science able to relate them in numerical programming of <br> modelsof physical systems. | PO4 |
| PSO - 3 | To impart knowledge of a broad range of Computer Science <br> skills, tools, and mathematical techniques, and the capability <br> ofapplying them to analyze and design complex systems. | PO8 |
| PSO - 4 | Acquire logical and analytical skills to apply the concepts to model <br> and solve real life problems in related areas. | PO2 |
| PSO-5 | Engage in professional development in the fields of <br> InformationTechnology and Computer Science. | PO8 |

MATHEMATICS CLOUD COMPUTING COMPUTER SCIENCE

| PSO-No | Upon the successful completion of B.Sc., degree/with <br> Mathematics as one of the subject, the students will be able <br> to: | Mapping <br> with POs |
| :--- | :--- | :--- |
| PSO-1 | Acquire good knowledge and understanding in advanced areas <br> of mathematics andstatistics, chosen by the student from the <br> given courses. | PO1 |
| PSO - 2 | Design, implements, test, and evaluate a computer system, | PO4 |
| PSO - 3 | component, or algorithm to meet desired needs and to solve a <br> computational problem | PO8 |
| PSO - 4 | Demonstrate understanding of the principles and working of the <br> hardware and software aspects of computer systems | PO2 |
| PSO-5 | Acquire the fundamental ideas behind Cloud Computing, the <br> evolution of theparadigm, its applicability; benefits, as well as <br> current and future challenges | PO8 |

## Levels of attainment of PO

POs \& PSOs attainment are characterized in to 3 levels
Level 3 - High
Level 2 - Medium
Level 1 - Low Not addressed

## Targets/ benchmarks for the level at which a PO is addressed

If $50 \%$ of classroom sessions/tutorials/lab sessions address a particular PO, it is considered that the PO is addressed at Level 3

If $25 \%$ to $49 \%$ (less than $50 \%$ and rounded off to two decimals) of classroom sessions/tutorials/lab sessions address a particular PO, it is considered that the PO is addressed at Level 2

If $5 \%$ to $24 \%$ (less than $25 \%$ and rounded off to two decimals) of classroom sessions/tutorials/lab sessions address a particular PO, it is considered that the PO is addressed at Level 1

If less than 5\% of classroom sessions/tutorials/lab sessions address a particular PO, it is considered that the PO is not addressed

## Semester I

## Course: Differential Equations

## Programme: Mathematics, Physics, Computer Science

Faculty concerned : Smt. B.Sravani

| CO <br> No | Upon the successful completion of the <br> course students will be able to | PO's/PSO's | Cognitive level |
